Axys LTC

You've never seen LTC pharmacy software like this.

Pharmacy Management System Built with the Most Modern Technology

Axys is long-term care's first cloud-based pharmacy management software – and that's a difference that matters. The software runs in a web browser and dramatically eases the usual burdens of learning, training, upgrades, and support – allowing you to care for patients with more focus and freedom.

"As a rapidly growing pharmacy, we are often hiring new technicians, and it's important for us to be able to onboard them in a quick, efficient manner. This system has been designed with the user in mind – it's fast, intuitive and easy to use, enhancing our productivity, which in turn allows us to focus our energy on resident care and customer service."

Data Entry Supervisor

Advantages of the Cloud

Having the latest technology is a big advantage as the long-term care industry evolves. Axys offers distinct benefits like no need for servers and backups, 99.9+% uptime, fast updates, low-cost scaling, comprehensive security, and market-leading reliability.

Easy to Learn and Train

In an environment of staff turnover, you need software that's intuitive to today's typical user. The UX professionally designed screens in Axys substantially lower training time.

Lower Total Cost of Ownership

With no need to purchase and continually upgrade server hardware, less time spent on training and product support, and improved workflow, Axys pharmacies see a real return from their investment.

World-Class Support

Our customer support and success teams are an extension of your pharmacy – dedicated, responsive subject matter experts with unique control of your data conversion experience and near 5-star satisfaction scores.
