## Advanced Pharmacy Switch and Transaction Solutions

RedSail Technologies operates PowerLine, a robust pharmacy claims switch with unparalleled scalability in pharmacy data transactions. PowerLine's world-class cloud-native architecture offers a remarkable availability rate of 99.99%, providing you with reliable, HIPAA-compliant services. The platform is architected to scale to any required transaction volume while maintaining best-in-industry speed and security.

PowerLine's direct connectivity to pharmacy benefit managers ensures pharmacy management systems and service providers can effortlessly manage claims, perform pre- and post-edits, and facilitate direct messaging.

PowerLine is an independent pharmacy switch unaffiliated with distributors or PBMs and is dedicated to providing best-in-class service to the network we serve.

### Key Benefits

#### Most Technologically Advanced Pharmacy Switch

With its cloud-native architecture developed using leading-edge tools and techniques, PowerLine consistently delivers near-instantaneous millisecond response times, ensuring seamless, ultra-responsive operations.

#### Unmatched Performance and Experience

Deployed across four+ geographic zones and with multi-layered security, including 24-7 monitoring and machine learning, PowerLine delivers industry-leading 99.99% uptime.

#### Designed for Growth

PowerLine's serverless microservices design allows it to scale to any required transaction volume automatically, with no impact to response time, uptime, or security.

#### Rapid Activation

With a state-of-the-art rules engine and modern connectivity framework, RedSail can activate pharmacies and partners rapidly on the platform.

### Technical Capabilities and Performance

- HITRUST + SOC2 Type 2 Certified
- Immutable component design allowing platform recreation in minutes if needed
- Multi-layered security, including 24/7 monitoring augmented by machine learning
- Extreme scale and performance exceeding traditional communications by more than 100x
- Deployment and system updates executed with zero disruption to service
- Deployment across 4+ geographically distinct availability zones, ensuring geographic and resource diversity for total resilience
- Advanced data warehousing techniques to empower customer support
- Dynamic rules engine to enable custom edits
- With decades of collective industry experience, the team provides round-the-clock monitoring and management, 24/7, 365 days a year
