

PowerLine[®]

Transaction Processing Services for Pharmacy Claims

PowerLine claims switch provides tools for managing pharmacy claims. It receives NCPDP transactions and orchestrates their processing, including calling add-on services, sending the transactions to processors, performing post-adjudication processing, and returning responses to submitters. These tools enable pharmacy service providers to streamline claim editing, submission, and adjudication. They also enhance claim accuracy and verify patient coverage.

PowerLine stands out as a remarkably customer-friendly alternative for claims management that's unaffiliated with any distributor or PBM. In an industry focused on security and reliability, PowerLine's ultra-modern technology is second to none, and it touches virtually every U.S. pharmacy through in-flight or post-transaction processing.

Key Services

Claims Processing

Secure, centralized links certified by DirectTrust (formerly EHNAC) offer detailed adjudication including checking eligibility, applying formulary rules, and calculating payments.

BIN Hosting

Services to help submit speedy and accurate claims, to update prices, prescribers, and other clinical information, and more.

Additional Claims Management

BIN hosting can support custom formulary lists to include covered drugs and specific pricing based on NDC.

Data Services

Paradigm-shifting data warehouse technology for smooth collection and transmission of vital healthcare data.

Performance Metrics

Any transaction can be queried instantly by PowerLine's support application for comprehensive metrics – single pharmacy, BIN specific, or platform-wide.

Powerline & RedSail Advantage Solutions

RedSail Advantage offers solutions, enabled by PowerLine, that provide greater profitability for pharmacies and extend the reach of their pharma partners. Learn more about these programs for patient education, medication adherence, cash pricing, copay assistance, and medical billing.

Distinctive Benefits for Partners

- Seamless connection between transaction services infrastructure, patient engagement platform, and pharmacy management software
- Unified data store with an unparalleled combination of patient, location, and claim information
- Primary and secondary adherence programs, laser-targeted patient education, brand penetration, financial assistance, and more

PowerLine's ultra-modern technology is second to none, and it touches virtually every U.S. pharmacy through in-flight or post-transaction processing.
