RedSail Clinical Program Types

Primary Non-Adherence: Educational opportunities with or without co-pay assistance. Increases rate of first-fill pickup at the pharmacy.

Secondary Non-Adherence: Predictive modeling, intervention, and continued use of education and co-pay assistance. Increases timeliness and rate of refill adherence at the pharmacy, decreases complete abandonment.

Comprehensive Counseling: A blend of primary and secondary non-adherence program types, resulting in increased adherence and a healthier patient community.

Therapy Gaps: Identifies patient cohorts attractive for selective therapy actions. Results in successful encounters at the pharmacy and healthier patients.
