

YOUR PRESCRIPTION FOR **SUCCESS**

Key Features

RxMile turns pharmacy delivery from a costly necessity into a strategic advantage. Our technology platform streamlines operations, improves efficiency, and helps pharmacies maximize the return on every delivery. With RxMile, the future of pharmacy delivery isn't just promising—it's already here.

GPS Tracking

Track real-time delivery status through live portal, enhancing the patient experience

Proof of Delivery

View proof of delivery images and signatures through private portal—with records stored for 10 years for auditing purposes

HIPPA Compliant

Manage deliveries through an end-to-end encrypted platform, ensuring PHI is secure

Integration

Utilize built-in integration with top pharmacy management softwares, providing a unique advantage to operations

The Benefits

- ✓ **Offline Mode:** All data is stored without a wifi connection. As soon as the driver has a secure data connection, completed deliveries are synced; no manual effort required.
- ✓ **Patient Communication:** Patients can track their package, text/call their driver, and confirm delivery with photo proof.
- ✓ **On-Demand Uber:** For an unplanned, last-minute delivery—pharmacies can utilize the Uber® integration for a quick one-off delivery.
- ✓ **Digital Signature:** Patients can sign for prescriptions from their own device, eliminating operational friction and effectively protecting patient data.

RxMile Delivers

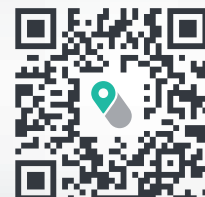

5.6M+ Packages Delivered

11.6M+ Prescriptions Delivered

\$638M+ Medication Value Delivered

1.2M+ Nationwide Patients Served
